

**Interdisciplinary Soft Skills: A Model for  
Integrating Public Speaking into  
Science-based Courses to Reduce  
Public Speaking Anxiety**

**Chris Morgan, Nick Fuhrman, Milton  
Newberry, & Sarah DeLoach  
University of Georgia**

# Introduction

- College graduates lack soft skills such as public speaking necessary to succeed in the workplace (Brooks et al., 2008; Crawford et al., 2011)
- Traditional public speaking courses build oral communication skills in a formal (classroom) environment
- **Can science-based courses taught in a non-formal environment reduce public speaking anxiety like a public speaking course can?**

# Methods Course Set-up

<b>Public Speaking Course (n = 44)</b>	<b>Science-based Course (n = 17)</b>
<ul style="list-style-type: none"><li>• Three <b>indoor</b> speaking opportunities (including a demonstration)</li><li>• Course content:<ul style="list-style-type: none"><li>• Reducing anxiety</li><li>• Speaking to inform and persuade</li><li>• Using body language</li></ul></li></ul>	<ul style="list-style-type: none"><li>• Three <b>outdoor</b> speaking opportunities (including a demonstration)</li><li>• Course content:<ul style="list-style-type: none"><li>• Wildlife ID</li><li>• Influencing conservation efforts</li><li>• Teaching 101</li></ul></li></ul>

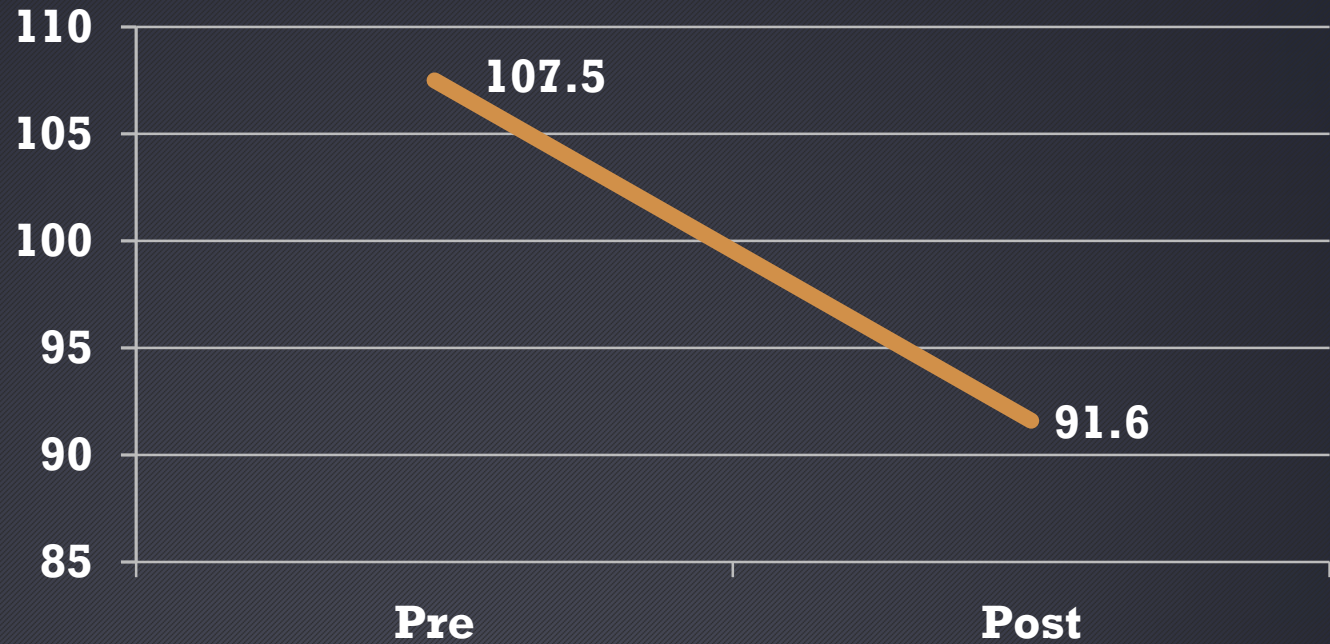

- Student public speaking anxiety (PSA) measured using the *Personal Report of Public Speaking Anxiety* (PRPSA) instrument (McCroskey, 1970)
  - Cronbach's alpha > 0.90 in pilot tests
- Paired samples *t*-test to check for differences between pre-course and post-course anxiety scores
- Independent samples *t*-test to check for differences between groups

# Results

## PRPSA Score Formal Speech Course

$t$ -value = 8.622,  $p$  = .000, Cohen's  $d$  = .72

# Results

## PRPSA Score Non-Formal Science Course

$t$ -value = 2.572,  $p$  = .020, Cohen's  $d$  = .54

# Model

**S** - Students **sign-up** for presentation topic and date

**P** - **Present** expectations to students

**E** – **Establish** grading rubric and share with students

**A** – Student **attends** meeting with instructor in advance to help them understand material, lab equipment, etc. (establish rapport)

**C** - Student **conveys** information using identified expectations

**H** - Student “**hears**” feedback on their presentation through rubric-based evaluations

Thank you!
